

WASTE #2 - TIME IN WAITING

VERSION 2 - NOV 2017

7 YEARS ON OUR SOLUTIONS CONTINUE TO CREATE CUSTOMER VALUE

Since 2010, we have completed 1053 Steel Efficiency Review® consultations on businesses of all shapes and sizes across a full spectrum of industries.

In these SER® consultations, we look closely at your operations, we work together to identify cost and time savings, remove bottlenecks and recommend incremental changes which can translate into exponential profit improvements.

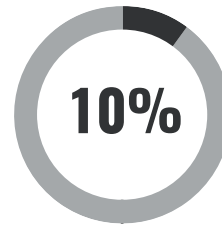

The SER® provides key recommendations based on those well-known 7 areas of waste:

- | | |
|--------------------------|--------------------|
| 1 OVER PRODUCTION | 5 INVENTORY |
| 2 TIME IN WAITING | 6 MOTION |
| 3 TRANSPORTATION | 7 REWORK |
| 4 PROCESSING | |

**WASTE #2
TIME IN WAITING**

TIME IN WAITING was considered to be a challenge for steel businesses serving diverse industries in Australia.

105 clients from the 1053 completed Steel Efficiency Review® consultations, a total of 10% found opportunities to make improvements and savings in TIME IN WAITING.

These clients worked with our SER® consultants to jointly identify hidden TIME IN WAITING wastes in their operations.

Key SER® findings revealed the issues at hand with proposed solutions to provide step change improvements resulting in operational cost savings, greater efficiencies in production runs and overall profit improvement.

**TIME IN WAITING
RECOMMENDED SOLUTIONS**

Utilising the Steel Efficiency Review® to better understand businesses serving diverse industries, our SER® consultants have recommended the following solutions to help with TIME IN WAITING:

- > SUPPORT WITH SEMI-FINISHED MATERIAL**
- > SALES FORECASTING TOOLS AND BUSINESS SUPPORT**
- > ACCESS TO CUSTOMER-OWN STOCK**
